**CREDIT CARD PAYMENT:** All Major Credit Cards are accepted over the phone or online at [www.gbenergy.com](http://www.gbenergy.com).

**CREDIT TERMS:** With approved credit, payments are due within 30 days of delivery or service. Balances are considered past due 31 days after the delivery or service date and will accrue pro-rata finance charges at a rate of 18% APR. G&B Energy reserves the right to deny or discontinue credit for poor payment history or based upon information provided from an outside source.

**RETURNED CHECK FEE:** A fee of up to \$35.00 will be charged to cover the deposit return fee assessed by financial institutions and administrative expenses associated with the return of a customer check.

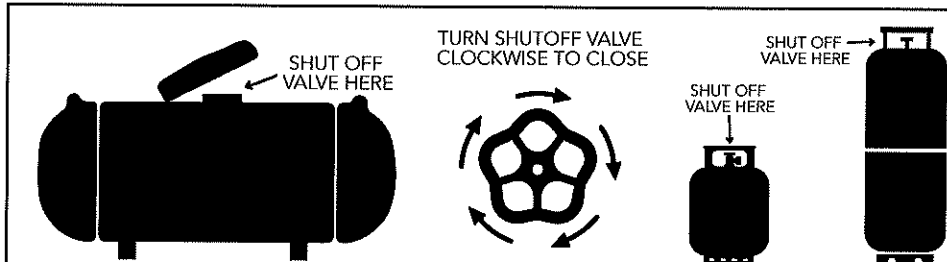

**EFT CHECK CONVERSION:** When you provide a check as payment, you authorize us to either use information from your check to make a one-time electronic fund transfer (EFT) from your account or to process the payment as a check transaction. When we use information from your check to make an EFT, funds may be withdrawn from your account as soon as the same day we receive your payment, and you will not receive your check back from your financial institution.

## SAFETY NOTICE

### WHAT TO DO IF YOU SMELL GAS:

1. Put out all smoking materials and other open flames.
2. DO NOT operate a light switch, telephone, cigarette lighter, appliance or thermostat. Any spark in the area where propane gas is present may ignite the gas.
3. Get everyone out of the building immediately.
4. Shut off the gas supply at the tank or cylinder.
5. Call your gas supplier - use your neighbor's telephone if gas odor is in the building.
6. Have your propane gas service person locate and repair the leak. Check and re-light your gas appliances and air out the area before you return.

### HOW TO CLOSE GAS SUPPLY VALVES:

Propane has an unusual odor, similar to rotten eggs.

Propane is heavier than air; therefore, leaks will tend to settle to floor or basement levels. To check for propane, carefully smell in low spots.

Under some of the following conditions, you may not be able to smell a gas leak.

- Colds, allergies, sinus congestion and the use of tobacco, alcohol or drugs may diminish your sense of smell.

- Cooking or other strong odors may cover up the smell of gas.

- On rare occasions, propane gas may lose its distinctive smell - this is called "ODORANT FADE".

- Sometimes propane gas can lose its odor if leaks occur underground.

- Some persons are physically unable to detect the smell of gas. If you are one of those people, call us immediately.

For these reasons, we recommended that you install a propane gas detector according to the manufacturers instructions.
