INVOICE

Services	amount
3T American Standard 14 Seer Single Stage AC with 90% Gas Furnace	\$8,985.17
Replacement of Existing Line Set because due to wrong size existing line set. <small>With the new EPA required 454B equipment almost all 2nd floor systems will have to have a new line set run for proper efficiency and performance. This isn't optional unfortunately. Those contractors skipping this step are put you at risk with damaging equipment/decrease of life span and also you are losing BTU capacity and major performance loss. This is one of the big negatives to this new equipment switch over. Price includes all material and extra labor to complete the job. This will add either two extra men or an extra day to the install.</small>	\$0.00
AC and Furnace Upgrades and Additional Information	\$0.00
