**SCOPE OF WORK:**  
 Set 500 Gallon LP gas tank off the back right corner of the home in the edge of the woods. Trench and bury gas line to the generator then around the corner of the home to the water heater. Install tankless water heater in the mechanical room and vent out the left side of the building. Run black iron to the generator and the water heater and put on air for inspection. Return after inspection to make final connections and perform leak check.

**DISCLAIMER :** Deviations from above stated scope of work will be billed at regular time & material rates. Prices valid 30 days from date of estimate. Delivery charges may apply. Estimates that include LP Gas will receive a separate invoice for LP Gas. Special order items require a 25% non refundable deposit prior to order!
