| 1089739900 | 05/28/2026 |         | <p><b>Completion Notes:</b> We removed the existing package unit and installed a new Trane 4 ton 15 seer gas package unit. We installed a new thermostat and metal shroud hood. We reconnected to the existing duct &amp; electrical. We did a thorough check of the ductwork. All of the flex duct under the house was connected &amp; nothing was in terrible shape or burst when we checked it on 5/28. Over time you will see this shiny jacket on the flex duct starting to deteriorate. Eventually it will come apart but there's not a time frame on that and isn't an emergency. Overall the duct is not in bad shape. There was some floor insulation that had dropped down. Just keep a check on it every so often and let us know if you have any issues.</p> <p>TRANE 4 TON 15 SEER GAS PACKAGE UNIT:<br/>MODEL: 5YCZ5048A1090AA<br/>SERIAL: 25464060FA</p> <p>THERMOSTAT:<br/>MODEL: TCONT724AS42DA<br/>SERIAL: 2540R6A3EX</p> |
