05/15/2026 - Technician: Peter Hill - Work Performed: Repair - 0515/26- Customer stated that the water heater at the labor camp wasnt working correctly and just wanted it replaced. Tech looked at the water heater and found water stains on the fan housing. Tech removed the old water heater. Tech had to meet Zack and pick up a new RE199e water heater, plumb kit and enclosure kit. Tech then returned to the labor camp and installed the new water. Leak tested- no leaks found. Lit appliances.
Customer would like us to look at the old water heater since it's still under warranty.
